

What Did We Learn

From the project we had learnt a number of various things:

- Research and gap identification skills.
- Importance of data and feedback
- Tooles and technology integration
- How to use AI models to give what we want and how to check if the given content is correct
- The importance of teamwork and coordination skills
- How to do proper documentation
- Gained presentation skills and overcame stage fright
- Time management
- Scop identification
- How to work with HTML, VS Code, Figma and GitHub
- Resolving confects among the group and avoiding misunderstandings
- Communication skills
- How with holding information can cause delays and setbacks
- How discussions are more effective when in person rather than online
- Handling edge cases
- How to do partial implementation
- How online learning has become an integral part of self-learning
- How setting a deadline is important
